Summary

Software engineer working on open-source developer tools and local products. First place at the Telesom Xalkadoon Hackathon 2025.

Skills

- **Languages:** Go, TypeScript, Python, Rust

Experience

Aduunyo Solutions **Hybrid**
Software Engineer *Jan 2026 – Present*

- Migrated client and transaction data from a legacy CRM to the new Aduunyo CRM (Python ETL).
- Review code and advise on system architecture.

Ardaykaab Academy **Hybrid**
Mentor *Feb 2026 – Present*

- Mentor students in full-stack development, REST APIs, Git and databases.

Freelance **Remote**
Digital Marketer & Graphic Designer *2023 – 2025*

- Designed branding and user interfaces for startups (Figma, Illustrator, Photoshop).
- Ran digital ad campaigns for clients.

Projects

Mongoose Studio **TypeScript, Node.js, React**
Open Source Creator *2026*

- CLI that serves a local web GUI for a project's Mongoose models and data. 2k+ npm downloads.

shotdock **Rust, GTK4, Wayland**
Open Source Creator *2026*

- Screenshot and screen recording tool for Wayland compositors (Hyprland, Sway, River, Niri) with window framing and OCR. Packaged on the AUR.

Hush **QML, Quickshell, Hyprland**
Open Source Creator *2026*

- Dynamic island shell for Hyprland, built on Quickshell. Combines the bar, launcher, notifications, control center, lock and login screens in one pill. Packaged on the AUR.

Awards & Hackathons

1st Place Winner — Telesom Xalkadoon Hackathon
Telesom Academy & Telesom Group *Dec 2025*

- Won first place and a $5,000 prize for Ogaal, a drought early-warning system with USSD and SMS reporting and a Python analytics engine.
